3

Foreign Key Creation Steps

▶ Change Existing Table Structure

▶ By adding a constraint

▶ Name the FOREIGN KEY field

▶ Referencing the external table and field

▶ Optional triggers

4

Foreign Key Syntax

```
ALTER TABLE
  table_name
ADD CONSTRAINT
  fk_referencing_table_source_table
FOREIGN KEY
  (field_name_in_parens)
REFERENCES
  other_table_name (primary_key)
;
```

```
ALTER TABLE
  table_name
ADD CONSTRAINT
  fk_referencing_table_source_table
FOREIGN KEY
  (field_name_in_parens)
REFERENCES
  other_table_name (primary_key)
-- Optional Triggers: ON DELETE (NO ACTION / CASCADE / SET NULL)
ON DELETE CASCADE
;
```

5

Foreign Key Example

```
CREATE TABLE sales
(
  sales_id PRIMARY KEY,
  export_id NUMBER(15,0) NOT NULL,
  description VARCHAR2(100)
-- Other Fields not shown
);

CREATE TABLE exporters
(
  export_destination_code NUMBER(15,0) PRIMARY KEY
-- Other Fields not shown
);
```

```
ALTER TABLE
  sales
ADD CONSTRAINT
  fk_exporters_sales
FOREIGN KEY
  (export_id)
REFERENCES
  exporters (export_destination_code)
;
```
